

308 Testing individuals

Observed 850K Genotypes

Mask to commercial assay densities

130K (GGP-HD)

76K (GGP-90KT)

50K (SNP50)

26K (GGP-LD)

8K (ULD)

Impute against CR to test impact of starting SNP density

Composite Reference (CR)

Extract Gelbvieh individuals

Breed Reference (BR)

Impute against CR and BR to test impact of multi-breed reference panel
